

## **Storm-Free Caribbean Islands to Visit Right Now**

In these warm-weather destinations, the chances of a hurricane ruining your trip are low.

Summer is an ideal time to travel to the Caribbean thanks to lower off-season rates and fewer crowds, but it can be tricky, especially in hurricane-prone areas at risk of being affected by severe weather. If you're nervous about the possibility of foul weather ruining your Caribbean vacation, fret not: There are plenty of tropical locales that are rarely impacted by hurricanes. Here are three idyllic spots where you can steer clear of tropical storms and enjoy relaxing island vibes, picturesque scenery and luxurious accommodations this summer.

### **Bonaire**

Bonaire, like its sister ABC islands Aruba and Curaçao, offers a temperate climate and idyllic location outside the hurricane belt. You can expect pleasant, 80-degree Fahrenheit temperatures and reduced crowds (and prices) at this time of year. During your trip, make sure to try your hand at kitesurfing. Some of the best spots are located on the southwest tip of Bonaire, where the tradewinds create a perfect environment for the thrills of the watersport. If you've never tried kitesurfing before, the Bonaire KiteSchool offers private and semi-private lessons.

And when it comes to accommodations, consider bedding down at the upscale Harbour Village Beach Club, which is home to the island's only private beach. Here, you'll find La Balandra Restaurant and Bar, which boasts a dining deck on a jetty, giving guests the experience of sailing while savoring fish-to-fork specialties. Plus, the private beach boasts ideal conditions for snorkeling or diving expeditions with Great Adventures Bonaire. Paddle board, kayak or take a private boat charter. If you'd rather kick back and relax, head to the hotel spa or the secluded cascade pool.
